About Me

Hello, I am Ahmed, with over 4 years of experience as a dynamic Front-End Developer, I've successfully translated intricate design concepts into seamless and interactive web applications. This process involves a meticulous eye for detail and a dedication to crafting visually stunning and user-friendly interfaces.

In addition, my skill set includes a solid foundation in crafting responsive websites. I leverage cutting-edge JavaScript frameworks like React and Angular to enhance the functionality and interactivity of web applications.

Furthermore, my commitment extends to optimizing user experiences. This is evident in projects where I seamlessly integrate modern animations, ensuring a captivating and engaging online presence for end-users.

In my journey as a Front-End Developer, I go beyond mere coding. I am deeply committed to harmonizing design aesthetics with programming prowess, creating websites that not only meet technical specifications but also resonate with users on a visual and experiential level.

Work Experience

Frontend Developer
Oct 2022 to March 2024

Remotely - Part time
Bahrain

- Translated intricate design mockups into fully functional web pages using HTML, CSS, and JavaScript.
- Collaborated seamlessly with UI/UX teams, employing Figma for precise design implementation.
- Ensured a cohesive and visually appealing user interface aligned with design concepts.
- Rigorously tested and optimized websites for seamless performance across diverse browsers.
- Implemented strategies to maintain a universal accessibility standard, ensuring a consistent and inclusive user experience.
- Conducted thorough browser compatibility testing to identify and resolve potential issues.
- Engineered responsive layouts that dynamically adapted to various screen sizes and devices.
- Employed best practices in responsive design to enhance accessibility and usability.
- Integrated media queries and flexible grids to optimize the user experience across different devices.
- Fostered effective collaboration with UI/UX designers and backend developers, ensuring a holistic approach to web development.
- Utilized Vue.js for front-end development, enhancing the interactivity and functionality of web applications.
- Established efficient communication channels with the backend team through tools like Postman, ensuring seamless collaboration.
- Tracked tasks and maintained project transparency using Trello, facilitating efficient workflow management.
- Contributed to a well-organized project structure, ensuring timely deliveries and meeting project milestones.
- Participated in regular project meetings, providing updates on progress and addressing potential challenges.

🔳 Projects at Tonsetech

🔗 Faatora

- **Role:** Front-End Developer
- **Responsibilities:**
  - Integration with Laravel Backend:
    - Collaborated closely with the Laravel backend team to seamlessly integrate front-end functionalities.
    - Utilized effective communication channels to ensure a smooth data flow between the front-end and back-end components.
  - Dynamic Item Preview:
    - Implemented dynamic preview functionality for items created in the Laravel backend.
    - Displayed items dynamically on the front-end, offering a real-time preview for users during the invoice creation process.
  - CSS and JS Enhancements:
    - Applied expertise in CSS and JavaScript to enhance the visual appeal and interactivity of the Faatora Invoice System.
    - Ensured a user-friendly and intuitive experience through thoughtful design and interactive elements.
  - Invoice and Delivery Note Creation:
    - Played a crucial role in the development of features for creating invoices, delivery notes, and other related documents.
    - Collaborated with the backend team to synchronize data and ensure accurate representation on the front-end.
  - Database Interaction:
    - Worked in conjunction with the Laravel backend team to integrate front-end elements with the database.
    - Ensured that created items and data were accurately reflected in the preview and throughout the system.

🔗 Tonsetech Informative Website

- **Role:** Front-End Developer
- **Responsibilities:**
  - Spearheaded the development of Tonsetech, serving as the lead Front-End Developer.
  - Translated design specifications from Figma into a functional and visually appealing website using HTML, CSS, and JavaScript.
  - Collaborated closely with the project manager to streamline tasks and project workflows, utilizing Trello for efficient task management.
  - Ensured precise implementation of design elements, maintaining alignment with the Figma design for a cohesive and polished user interface.
  - Implemented responsive design strategies, guaranteeing optimal performance across diverse devices.
  - Conducted regular progress updates and feedback sessions with the project manager to ensure project milestones were met effectively.

🔗 BusinessTech

- **Role:** Front-End Developer
- **Responsibilities:**
  - Translated Figma designs into functional and visually appealing web interfaces.
  - Implemented HTML, CSS, and JavaScript to bring design concepts to life.
  - Played a key role in ensuring a seamless integration of technology and design.
  - Contributed to creating user-centric and visually engaging experiences.
  - Collaborated closely with design teams to handle Figma design conversions effectively.

Finboa
Sep 2021 to Jan 2022

- During my tenure as the Front-End Developer at **Finboa**, I played a pivotal role in crafting visually stunning and responsive web pages. Leveraging my proficiency in CSS and Angular.js, I meticulously styled pages to meet both aesthetic and functional requirements.
- Working within a dynamic and skilled team, I had the privilege of collaborating with seasoned professionals, gaining valuable insights, and contributing to a culture of continuous improvement. The collaborative environment fostered creativity and innovation, allowing us to collectively deliver high-quality front-end solutions.
- Task management was streamlined through the use of Trello, a tool that facilitated clear communication and efficient allocation of responsibilities. This approach ensured that the team operated seamlessly, meeting project milestones and exceeding client expectations.
- As the Front-End Developer, I not only added aesthetic value to the user interface but also actively contributed to the overall success of projects through effective collaboration, skillful execution, and a commitment to excellence.

Neqat International
Jan 2021 to Sep 2021

Onsite - Part time - Internship
Egypt

- **Front-End Architecture**: Assume responsibility for architecting and defining the Front-End framework, addressing intricate design challenges and interactions to align with creative and artistic direction.
- **Collaborative UX/UI Enhancement**: Collaborate closely with UX/UI design teams to enhance website and dashboard functionality, translating design concepts into real-world applications.
- Mentorship and Guidance: Lead the creation of all coded Front-End deliverables while providing mentorship and guidance to technical team members, ensuring consistent excellence in all project activities.
- **Daily Code Maintenance and Troubleshooting**: Engage in daily maintenance of code, proactively debugging issues, and systematically solving problems to maintain the robustness and efficiency of the Front-End solutions.

GDSC - MTI University
Oct 2023 to Present

- As the Vice Head of the Web Development Section at GDSC - Google, I lead a dynamic team of talented individuals, driving innovation and excellence in the ever-evolving landscape of web technologies. With a commitment to fostering a culture of continuous learning and collaboration, I play a pivotal role in shaping the direction of our projects and ensuring they align with Google's standards of excellence.
- As an instructor, my primary focus is on empowering the next generation of developers through hands-on training and mentorship programs. I design and deliver cutting-edge curriculum, equipping participants with the latest tools, frameworks, and best practices in web development. Through interactive workshops, coding sessions, and real-world projects, I guide students in developing practical skills that are not only relevant but also highly sought after in the industry.
- In addition to technical expertise, I emphasize the importance of problem-solving, critical thinking, and effective communication in my instructional approach. I believe in cultivating a learning environment that encourages creativity and curiosity, inspiring students to push boundaries and think beyond conventional solutions.
- Collaborating closely with industry experts and staying abreast of emerging trends, I ensure that our educational programs remain at the forefront of the rapidly evolving web development landscape. Through strategic partnerships and engagement with the wider tech community, I contribute to the establishment of GDSC - Google as a hub for innovation and learning in web development.
- In summary, my role as Deputy Head of Web Development Section and Instructor at GDSC - Google revolves around leading a talented team, shaping project strategies, and empowering aspiring developers with the knowledge and skills they need to thrive in the dynamic world of web development.

Technology Skills

- HTML5
- CSS3
- Javascript
- VueJS
- Nuxt.js
- Bootstrap
- Tailwind
- Sass
- Gulp
- Pug JS
- JQUERY

Soft Skills

- Communication
- Collaboration
- Problem-Solving
- Adaptability
- Attention to Detail
- Tailwind
- Time Management
- Continuous Learning
- Empathy
- Openness to Feedback

Education History

Faculty of Education *2022 - 2026*
Bachelor Degree
